CONTENTS OF VOLUME 85

NUMBER 1—MAY 1995

Relationships between impact sensitivities and molecular surface electrostatic potentials of nitroaromatic and nitroheterocyclic molecules
By J. S. Murray, P. Lane and P. Politzer 1

Adsorption isotherms of associating chain molecules from Monte Carlo simulations
By E. A. Müller, L. F. Vega, K. E. Gubbins and L. F. Rull 9

Thermodynamic and structural properties of model systems at solid–fluid coexistence. I. Fcc and bcc soft spheres
By R. Agrawal and D. A. Kofke 23

Thermodynamic and structural properties of model systems at solid–fluid coexistence. II. Melting and sublimation of the Lennard-Jones system
By R. Agrawal and D. A. Kofke 43

A new geometrically based integral equation hierarchy for fluids of hard-sphere systems. 3. Thermodynamics and structure of the hard-disc fluid
By J. Šedlbauer, S. Labík, A. Malijevský and W. R. Smith 61

Near infrared overtone spectroscopy of C_2D_2
By R. Grobklob, H. Wenz, S. B. Rai and W. Demtröder 71

Parameterizing polarizable intermolecular potentials for water with the ice Ih phase
By J. Brodholt, M. Sampoli and R. Vallauri 81

Equation of state and chemical potential of ternary mixtures of hard spheres and heteronuclear diatomics
By M. Strnad and I. Nezbeda 91

Distributed Gaussian basis sets: description of the Hartree–Fock ground state energies of N_2, CO and BF using s- and p-type Gaussian functions
By D. Moncrieff and S. Wilson 103

A rigorous energy partitioning scheme for analysis of molecular interactions
By M. Martinov and J. Cioslowski 121

Even–odd effects in liquid crystal dimers with flexible spacers: a test of the rotational isomeric state approximation?
By A. Ferrarini, G. R. Luckhurst and P. L. Nordio 131

***Ab initio* calculation of structures and vibrational spectra of XC(O)SSC(O)X (X = F, Cl)**
By Hong-Wen Lu, Xian-Wu Zou, Hong-Zhang Zhuang and Zhun-Zhi Jin 145

Grand canonical Monte Carlo simulations of chain molecules: adsorption isotherms of alkanes in zeolites
By B. Smit 153

Binary mixtures of simple fluids in structured slit micropores
By J. E. Curry and J. H. Cushman 173

The phase behaviour of short chain molecules: a computer simulation study
By M. R. Wilson 193

Research Note

The role of attractive forces in determining the thermodynamic properties of two-dimensional Lennard-Jones fluids
By F. Cuadros, A. Mulero and W. Ahumada 207

NUMBER 2—10 JUNE 1995

Announcement 219

An investigation of the conformation of 4-chloroethylbenzene as a solute in a nematic liquid crystalline solvent
By G. Celebre, G. De Luca, M. Longeri, D. Catalano, M. Lumetti and J. W. Emsley 221

Rayleigh and Raman spectral moments for N_2: experiment and simulation
By A. Mueller, M. Reh, M. Röder, W. Steele and H. Versmold 233

An *n*-valued representation of He_n^+ potentials
By P. J. Knowles, J. N. Murrell and E. J. Hodge 243

Variational theory for Lennard-Jones chains
By R. O'Lenick and Y. C. Chiew 257

Temperature and density evolution of the orientational correlations in fluids of linear molecules
By A. de Santis, A. Gregori and D. Rocca 271

Spectral spin diffusion of a spin-3/2 system in rotating solids
By S. Ding and C. A. McDowell 283

Rotational diffusion of biaxial probes in biaxial liquid crystal phases
By E. Berggren and C. Zannoni 299

Computation of spanning tree generators of fullerenes
By K. Balasubramanian 335

On the desymmetrization of the collision-induced roto-translational spectral profiles of pairs of freely rotating linear molecules
By A. Borysow and O. Ruehr 349

Photoinduced hydrogen abstraction reaction of 2,6-dichloro-*p*-benzoquinone studied by time-resolved electron spin resonance
By Qing-Xiang Meng and H. Hayashi 363

Spectroscopic studies of vibrational relaxation and chemical exchange broadening in hydrogen-bonded systems. III. Equilibrium processes in the pyridine/water system
By E. Zoidis, J. Yarwood, Y. Danten and M. Besnard 373

Spectroscopic studies of vibrational relaxation and chemical exchange broadening in hydrogen-bonded systems. IV. Analysis of the isotropic Raman bands of pyridine/water system
By E. Zoidis, J. Yarwood, Y. Danten and M. Besnard 385

Polarizabilities, atoms-in-molecules polarizabilities and bonding in $(CN)^-$, $(SCN)^-$, $(OCN)^-$ and $(ClO)^-$
By S. T. Howard 395

Research Notes

Adsorption of chemically reacting fluids on a crystalline surface
By O. Pizio, D. Henderson and S. Sokołowski 407

Solid–liquid equilibrium for quadrupolar molecules
By C. Vega and P. A. Monson 413

Approximate analytical expression for the direct correlation function of hard discs within the Percus–Yevick equation
By M. S. Ripoll and C. F. Tejero 423

Contents of Volume 85

NUMBER 3—20 JUNE 1995

Preliminary Communication: Dielectric constant of a Stockmayer fluid along the vapour–liquid coexistence curve
By Dezső Boda, János Liszi and István Szalai 429

The condition of microscopic reversibility in Gibbs ensemble Monte Carlo simulations of phase equilibria
By Luis F. Rull, George Jackson and Berend Smit 435

Empirical atom–atom potential for a naphthalene crystal and transferability to other polyacene crystals
By K. Yokoi 449

Excited states of the PF^+ and NCl^+ ions: a theoretical treatment
By Gap-Sue Kim and David M. Hirst 463

Free energy expressions for a spherical interface
By C. Varea and A. Robledo 477

Towards a double many-body expansion method for multivalued potential energy surfaces. The H_3, FH_2 and NO_2 systems
By A. J. C. Varandas and A. I. Voronin 497

The structure and energetics of B_3N_2, B_2N_3, and BN_4. Symmetry breaking effects in B_3N_2
By Jan M. L. Martin, Jamal El-Yazal, Jean-Pierre François and Renaat Gijbels 527

Quantization and the foundations of chemistry
By R. G. Woolley 539

On the orbital contribution to analytical derivatives of perturbation theory energies
By Timothy J. Lee, Stephen C. Racine, Julie E. Rice and Alistair P. Rendell 561

Quantum chemical studies of the pyrrole–water and pyridine–water complexes
By Muhamad A. Martoprawiro and George B. Bacskay 573

Interference enhanced surface Raman scattering of adsorbates on a silver–spacer-islands multilayer system
By H.-G. Bingler, H. Brunner, A. Leitner, F. R. Aussenegg and A. Wokaun 587

Rotational energy dispersions for argon clusters
By Lawrence L. Lohr 607

Soft X-ray photoabsorption of the NO dimer
By M. Pérez Jigato, V. Termath, P. Gardner, N. C. Handy, D. A. King, S. Rassias and M. Surman 619

Self-diffusion in equilibrium and sheared liquid mixtures by molecular dynamics
By W. C. Sandberg and D. M. Heyes 635

Fluid phase equilibria using molecular dynamics: the surface tension of chlorine and hexane
By José Alejandre, Dominic J. Tildesley and Gustavo A. Chapela 651

Research Notes

Tail corrections to the surface tension of a Lennard-Jones liquid–vapour interface
By E. M. Blokhuis, D. Bedeaux, C. D. Holcomb and J. A. Zollweg 665

SCF calculations of the NMR shielding tensor for the ethylenic carbon atom in C_3Cl_4
By Michael Jaszuński, Trygve Helgaker, Kenneth Ruud, Poul Jørgensen, Keld L. Bak and Henrik Koch 671

The ejection of excited state dimers from argon clusters: evidence from the preferential formation of $^{40}Ar_2^+$ over $^{36}Ar^{40}Ar^+$
By C. A. Woodward, J. A. Smith and A. J. Stace 675

Contents of Volume 85

NUMBER 4—JULY 1995

Vapour–liquid equilibria of propane and n-alkane conformers
By C. VEGA, B. GARZÓN, L. G. MACDOWELL and S. LAGO 679

Quantum dynamics by stochastic trajectories in phase space
By K. SINGER 701

Quantum dynamics and Wigner representation of quantum mechanics
By V. S. FILINOV, YU. V. MEDVEDEV and V. L. KAMSKYI 711

Mechanical control of redox enthalpy
By ARTHUR S. BRILL 727

Study of the ν_3 and $2\nu_4$ interacting states of $^{12}CF_4$
By T. GABARD, G. PIERRE and M. TAKAMI 735

Adsorption of fluids on colloidal particles: a density functional approach
By DOUGLAS HENDERSON, STEFAN SOKOŁOWSKI and ANDRZEJ PATRYKIEJEW 745

A quantitative electron spin resonance line shape study of the order–disorder transition in the lamellar phase of the palmitoyllysophosphatidylcholine–water system
By ZHICHUN LIANG, PER-OLOF WESTLUND, GÖRAN WIKANDER and GÖRAN LINDBLOM .. 757

The synchronous thermal decomposition mechanism of azoisopropane
By CHING-HAN HU, BOYONG MA and HENRY F. SCHAEFER III 769

Vapour liquid equilibria of mixtures from the *NpT* plus test particle method
By JADRAN VRABEC and JOHANN FISCHER 781

Sensitivity analysis in time-dependent quantum scattering theory
By YIWEN XIAO and LARRY ENO 793

Perturbations, intensity anomalies, and line broadening of $^{23}Na^{39}K$ studied by optical–optical double resonance polarization spectroscopy
By H. IKOMA, S. KASAHARA and H. KATÔ 799

Rotational band contour analysis of *nf* Rydberg complexes of CO_2 and the determination of the first ionization potential
By CLAUDINA COSSART-MAGOS, HÉLÈNE LEFEBVRE-BRION and MARTIN JUNGEN 821

Contents of Volume 85

NUMBER 5—10 AUGUST 1995

Vibronic structure of the CO_2^+ ion: reinvestigation of the antisymmetric stretch vibration in the $\tilde{X}$, $\tilde{A}$, and $\tilde{B}$ states
By MARK A. JOHNSON and JOËLLE ROSTAS 839

On the interaction of highly charged plates in an electrolyte. Reply to the criticism
By M. V. SMALLEY and I. S. SOGAMI 869

Natural embedding of $\mathcal{J} \equiv \mathcal{A}_5$ group in $SU(m \leqslant n) \times \mathcal{S}_{12}$ NMR spin algebras. I. Roles of model $\lambda \vdash n$ permutational modules and their related Kostka $A_{\lambda[\lambda^\sim]}$s in the NMR of $[^{11}BH]_{12}^{2-}$, $[^{11}BD]_{12}^{2-}$ exo-cage clusters
By F. P. TEMME 883

Sum rule for scattering of light in molecules and atoms
By STANISŁAW OLSZEWSKI 907

Hyperfine line shift in the EPR spectra of randomly oriented Cu(II) containing systems with axial symmetry
By ANNA RITA BIZZARRI and SALVATORE CANNISTRARO 913

Feynman–Hibbs potentials and path integrals for quantum Lennard-Jones systems: theory and Monte Carlo simulations
By LUIS M. SESÉ 931

Angular momenta correlation in kinematically constrained reactions: application to the Ba + HI → BaI + H system
By MARGARITA ALBERTÍ, XAVIER GIMÉNEZ, ANTONIO AGUILAR and ANGEL GONZÁLEZ UREÑA 949

Transition state dynamics of X + HX reactions using the time-dependent self-consistent field approximation
By ANNE B. MCCOY 965

The Jahn–Teller effect in solutions of flexible molecules: a neutron diffraction study on the structure of a Cu^{2+} solution in ethylene glycol
By S. EROL OKAN and PHILIP S. SALMON 981

Fluid structure around a rod-like molecule and the additivity rule of the partial molar quantities. 2. A hard needle in a hard sphere fluid
By YOSUKE YOSHIMURA 999

Adsorption–desorption kinetics in nanoscopically confined oligomer films under shear
By E. MANIAS, A. SUBBOTIN, G. HADZIIOANNOU and G. TEN BRINKE 1017

Research Notes

V_k centre of LiH crystal surface
By A. S. SHALABI 1033

Low-temperature thermal expansion of crystalline *ortho*-terphenyl
By M. A. RAMOS, S. VIERIA, F. J. BERMEJO and J. L. MARTINEZ 1037

Contents of Volume 85

NUMBER 6—20 AUGUST 1995

Structural origin of specific eigenvalues in chemical graphs of planar molecules. Molecular orbital functional groups
By JERRY RAY DIAS 1043

Magnetic circular dichroism spectroscopy of the iron cores of ferritin and bacterioferritin
By NICK E. LE BRUN, GEOFFREY R. MOORE and ANDREW J. THOMSON 1061

***Ab initio* prediction of the barrier height for abstraction of hydrogen from H_2O_2 by ClO radical**
By JOSEPH S. FRANCISCO and S. P. SANDER 1069

NMR investigation of $Mn(hfac)_2NITiPr$: evidence of nonlinear excitations in a one-dimensional ferrimagnet
By FABRIZIO FERRARO, DANTE GATTESCHI, ANGELO RETTORI and MAURIZIO CORTI 1073

Electric dipoles and phase stability in nematic liquid crystals
By A. G. VANAKARAS and D. J. PHOTINOS 1089

Rotation–vibrational states of H_2D^+ using hyperspherical coordinates and harmonics
By ALEXANDER ALIJAH, JUERGEN HINZE and L. WOLNIEWICZ 1105

Rotation–vibrational states of D_3^+ computed using hyperspherical harmonics
By ALEXANDER ALIJAH, L. WOLNIEWICZ and JUERGEN HINZE 1125

An algorithm for the computer simulation of four-roller flow
By DAVID R. J. MONAGHAN, GARY P. MORRISS and DENIS J. EVANS 1151

Extrapolation method for cross-section from quantum mechanical $J = 0$ reactivity: $H + O_2$
By A. J. C. VARANDAS 1159

A generalized Solomon–Bloembergen–Morgan theory for arbitrary electron spin quantum number S. The dipole–dipole coupling between a nuclear spin $I = 1/2$ and an electron spin system $S = 5/2$
By P.-O. WESTLUND 1165

***Ab initio* methane dimer intermolecular potentials**
By JENÖ NAGY, DONALD F. WEAVER and VEDENE H. SMITH, JR. 1179

The static polarizabilities and hyperpolarizabilities of Li_2
By MANTHOS G. PAPADOPOULOS, ANDREW WILLETTS, NICHOLAS C. HANDY and A. DAVID BUCKINGHAM 1193

Bounds on spin dynamics tightened by permutation symmetry. Application to coherence transfer in I_2S and I_3S spin systems
By N. C. NIELSEN, T. SCHULTE-HERBRÜGGEN and O. W. SØRENSEN 1205

Green's function quantum Monte Carlo method in the presence of topological sign problems: π electronic systems
By JOHANNES SCHÜTT and MICHAEL C. BÖHM 1217

Solvation free energies of non-polar and polar solutes reproduced by a combination of extended scaled particle theory and the Poisson–Boltzmann equation
By MASAYUKI IRISA, TAKUYA TAKAHASHI, KUNIAKI NAGAYAMA and FUMIO HIRATA 1227

Research Note

In search of a thermodynamically self-consistent integral equation for linear molecular fluids
By E. LOMBA, J. A. ANTA, C. MARTÍN and M. LOMBARDERO 1239

Index of authors (with the titles of papers) 1247
